**Re: Notification of Substantive Change
CG Docket Nos. 03-123 and 10-51**

Dear Ms. Dortch:

This Notification of Substantive Change is provided pursuant to 47 C.F.R. § 64.606(f)(2) regarding a substantive change in ClearCaptions, LLC ("ClearCaptions") services and features as a provider of Internet Protocol Captioned Telephone Service ("IP CTS").

On March 27, 2019, ClearCaptions introduced a new iOS Application ("ClearCaptions Mobile App"). The beneficial features offered in the ClearCaptions Mobile app include:

- Bluetooth® connectivity
- Easy-to-adjust caption font, size and colors to accommodate individuals with impaired vision
- Simple importing of contacts into the ClearCaptions Mobile App from an existing iPhone contact list
- A useful "Favorites" list to enable one-touch dialing
- Improved location tracking for 911 support

ClearCaptions is proud to be the first IP CTS provider to offer a mobile application that utilizes the geolocation technology available within an iPhone to accurately identify a user's geographic location for the purpose of quickly routing an emergency call and emergency services providers (*e.g.*, fire, police, ambulance) when and where needed.

ClearCaptions certifies that this change did not affect its compliance with applicable minimum standards.

Respectfully,

/s/ Michael Strecker

Michael Strecker
